[linkedin.com/in/michael-nguyen-nl/](https://www.linkedin.com/in/michael-nguyen-nl/)

Specialized in back-end development and system design with experience in full-stack applications and server-side technologies. Focused on creating efficient, secure solutions and eager to keep learning.

WORK EXPERIENCE

FOOD SERVICE, LAN LIN LOEMPIA FOOD TRUCK

Aug 2025 - Present, Hornbach, Tilburg

- Manage food preparation and sales for family business.

PLC PROGRAMMER, IMP AUTOMATION

Feb 2025 - Jul 2025, Diessen

- Design, program, test, and maintain PLC-based automation systems.

EDUCATION

FULL-STACK DEVELOPER PROGRAM

Dec 2023 - Nov 2024, Ironhack

- Built projects focusing on back-end development using: HTML, CSS, JavaScript (Node.js, React), databases (MongoDB), and RESTful API design.
 - Created RESTful APIs to handle data between the front-end and the database, focusing on clean routing and clear error messages.
 - Set up MongoDB databases with Mongoose to organize data and ensure all user-submitted info was validated.
 - Implemented secure login systems using JWT to protect user routes and data.
 - Tested and debugged all API endpoints with Postman to ensure the back-end was stable and returned the correct data.

BASC, ELECTRICAL & ELECTRONICS ENGINEERING (UNFINISHED)

Sep 2022 - March 2023, Avans university of applied science

- Technical knowledge of electrical systems, wiring, circuits, electrical components and PLC programming.

BASC, ENGINEERING

Sep 2016 - Aug 2022, Koning Willem I College

- Studied engineering with focus on programming, electronics, system design and mechanical systems.

INTERNSHIPS

SYSTEM TEST & DESIGN ENGINEER, TURBIN

Dec 2020 - May 2021, Rijen

- Conducted FAT (Factory Acceptance Tests) for pump installations and created P&ID charts.

AUTOMATION ENGINEER, VERAUTOMATION

Nov 2019 - Feb 2020, Middelbeers

- Designed and programmed a lift for a machine line. Additionally, I performed cost calculations and prepared a quotation for the project.

CNC PROGRAMMER & EDM OPERATOR, ARTOOLING

Nov 2018 - Feb 2019, Tilburg

- Worked as a wire EDM operator. My responsibilities included programming using CAM software and setting up the machine and maintenance.

MAINTENANCE TECHNICIAN, FUJIFILM MANUFACTURING

Dec 2017 - Mar 2018, Tilburg

- Primarily collaborated with my supervisor to resolve various malfunctions occurring throughout the factory. These included PLC malfunctions, leaks, maintenance tasks, etc. (P6 and P10).

TECHNICAL SKILLS

Full-Stack Development

JavaScript, PHP, HTML, CSS, React.js, Node.js, Express.js, Laravel, REST API, JSON, MongoDB (NoSQL), Git

Hardware & Systems Engineering

PLC, Basic C, C#, Schematics, Troubleshooting, Wiring, Panels, Conduits, Inspection, Basic Metalworking
